Professional Summary

Full Stack Developer with a Bachelor's degree in Computer Science from Sree Buddha College of Engineering. Proficient in Node.js, Express.js, MongoDB, React, Redux, and C/C++. Eager to leverage theoretical knowledge and practical skills in a professional setting to contribute to the development of innovative web applications.

Education

MERN Stack

Prototype

2023 – 2024

Bangalore

Bachelor of Technology in Computer Science

Sree Buddha College of Engineering, KTU 

2019 – 2023

Pathanamthitta, Kerala

Skills

Backend:

Node.js, Express.js

Frontend:

React, Redux, HTML, CSS

Database:

MongoDB, SQL

DevOps:

Git, AWS

Design:

Figma

Programming Languages:

C, C++, Javascript, Typescript

Projects

Social Media Website, (<https://www.thecivic.lol>)

- Built a full-stack Social Media Website using TypeScript with a React.js frontend and Node.js & Express.js backend.
- Utilized MongoDB for robust database management, facilitating smooth data handling for user information and posts.
- Integrated Cloudinary for media storage, supporting efficient file handling and enabling users to upload and manage images.
- Implemented real-time chat using Socket.io for instant messaging between users.
- Added high-quality video calling with ZEGOCLOUD, allowing users to connect seamlessly through video communication.

Ecommerce website, (<https://coffeeblend.tech>)

- Developed this web design using Node.js, Express.js, and MongoDB.
- Frontend crafted with EJS and styled-components.
- Engineered and integrated new product browsing features, shopping cart management system, favorites functionality, and online payment solutions (Razorpay); optimized user experience.
- Engineered backend for user authentication, authorization, order processing, and inventory management.
- Developed an admin panel for managing user accounts, including blocking, unblocking, deleting, searching, listing(product, user, banner, coupons), and sorting.

Login page

Node.js, MongoDB

- Designed with Node.js, Express.js, and MongoDB.

- Enabled login, logout, and user creation.
- Developed an admin panel for managing user accounts, including blocking, unblocking, deleting, searching, listing, and sorting.

Spotify Clone

Html, CSS

- Developed a clone of Spotify Premium with HTML, CSS, and Bootstrap.
- Demonstrated frontend development and design skills by replicating core features of Spotify.

ToDo App

- ToDo App is web application built using MERN stack.
- It provides a simple and intuitive interface for managing your tasks and staying organized.
- Users can create, and delete tasks.

Login page

Node.js, MongoDB, React

- Designed with Node.js, Express.js, and MongoDB, React, Redux.
- Enabled login, logout, and user creation.
- Developed an admin panel for managing user accounts, including blocking, unblocking, deleting, searching, listing, and sorting.

Netflix Clone

React

- Succeeded Developing a clone of Netflix with HTML, CSS, and Bootstrap.
- Demonstrated frontend development and design skills by replicating core features of Netflix.

Olx clone

React, Redux

- Designed and developed the frontend using React and Redux.
- Implemented user authentication and authorization mechanisms.
- Developed backend services using Node.js and Express.js.
- Integrated MongoDB for data storage and management.

Declaration

I hereby declare that all the above-mentioned information given is true and correct to the best of my knowledge and belief.
